

Dolphin Plus software allows you to quickly and easily configure, monitor, tune and diagnose most Milltronics instruments remotely at your desktop PC, or connected directly in the field, using a laptop.

Dolphin Plus is easy to install and easy to use. Just load the software from the CD. In minutes, you're ready to set up or modify complete parameter configurations for single or multiple instruments in the Windows® environment.

After configuration, you can edit parameters on the fly, upload and download parameter sets to and from disk, and use parameter sets saved from other instruments. You can also work with echo profiles for fine tuning without the need for special instruments. Built-in Quick-Start Wizards and Help guide you through the entire process.

## Compatibility

Dolphin Plus works with a wide range of Milltronics products, including:

- Ultrasonic Level Measurement:
  - EnviroRanger ERS 500
  - InterRanger DPS 300
  - MiniRanger Plus
  - HydroRanger Plus
  - AiRanger XPL Plus
  - AiRanger DPL Plus
  - AiRanger SPL
- Radar Level Measurement:
  - IQ Radar 160
- Integrators:
  - Accumass BW100 and BW500

Connection to a Milltronics instrument may be a direct RS-232 serial connection, or via an RS-485 converter or Milltronics infrared ComVerter, depending on the instrument being configured.

Meets VDE 2187 user interface requirements.

## Product Features

- Real-time monitoring and adjustment of parameter values
- On-screen view of process values
- Save and view echo profiles for a wide range of Milltronics level measurement instruments
- Duplicate set-ups for programming multiple units
- Speed up instrument set-up and commissioning
- Generate instrument configuration reports in seconds

## System Requirements

- Desktop or laptop PC running Windows® 95/98 or NT (4.0)
- Minimum 16MB of RAM (32MB recommended)
- 10MB free hard disk space
- Monitor with minimum of 640x480 screen resolution with 256 colours (800x600 recommended)
- CD-ROM drive for loading software
