APT2000 Series
2-Wire pH Transmitters

Overview
The Honeywell Analytical Process Transmitter (APT) 2000 Series transmitter is a two-wire 24-Volt device that continuously measures pH or ORP in industrial processes including chemical, pharmaceutical, petrochemical, pulp and paper, and wastewater.

The APT2000’s NEMA 4x and IP65 rated enclosure is specifically designed to meet the measurement needs of intrinsically safe, non-incendive and general-purpose areas. Honeywell pH or ORP sensors or a wide variety of competitor electrodes can be used as input to the transmitter. A 4-20 mA output is standard on the APT2000. For bi-directional remote monitoring/control of the process, the Hart communications protocol is available as an option.

Description
The Honeywell APT2000 series of transmitters offer the widest available selection of advanced features in a reliable and economical instrument.

Reliability First
The advanced features of the APT2000 transmitter guarantee complete reliability. The APT2000 continuously monitors sensor and transmitter electronics and immediately displays diagnostic information at the onset of a problem. If an error or diagnostic is found, the transmitter will indicate the appropriate error code or pictograph (see Figure 2), blink a red LED and adjust the error current to 22 mA if desired. A manual loop-back check is available to test the integrity of the 4-20mA output.

Quick Problem Assessment
The APT2000 has a large front display for quick recognition of process parameters and diagnostics even at a distance. Only the APT2000 employs visual feedback to quicken setup and maintenance times and to minimize errors made during calibrations. Visual feedback refers to pictograph type characters that appear on the display both to prompt and respond to operator and process changes. Pictograph type characters also appear during problem conditions to report diagnostics for easy troubleshooting. There is even a Sensoface® pictograph that provides constant feedback to the operator on whether or not there is a problem with the sensor. These easily learned and recognized symbols make the APT2000 an easy-to-use instrument in any language.

Foolproof Calibrations
Calibration is easy with automatic buffer recognition, utilizing a variety of buffer standards recognized worldwide. Foolproof calibrations are ensured with special on-board diagnostics that monitor the step-by-step progress of each calibration. Simple messages with pictographs provide feedback on the status of the calibration. Manual one or two-point calibrations can also be performed for complete flexibility.
Works with a Variety of Electrodes
Input to the APT2000 Series includes the Honeywell Durafet II non-glass pH electrode (with the Honeywell cap adapter cable or adapter module), Meridian II glass pH electrodes, or metallic ORP electrodes. In addition, a wide variety of other manufacturers’ pH and ORP electrodes can be used with the APT2000.

Fully Certified
Area certifications for the APT2000 include both intrinsically safe and non-incendive ratings from FM and CENELEC. Each transmitter comes standard with CE.

Easily Integrated
The APT2000 Series transmitters can be continuously remote controlled via HART communications from a handheld terminal or the control room. This option enables additional visibility and control of your process.

Robust, tightly sealed plastic enclosure
Wall, pipe or panel mounting
Easy installation with pre-assembled empty enclosure and plug-in terminals
Optical alarm signaling by blinking red LED
Integrated current source for simple checking of peripheral devices
### Specifications

#### pH/mV Input

<table>
<thead>
<tr>
<th>Ranges</th>
<th>pH value: 0.00 to +14.00 pH</th>
</tr>
</thead>
<tbody>
<tr>
<td>ORP value:</td>
<td>-1500 to +1500 mV</td>
</tr>
</tbody>
</table>

#### Electrode input types

- Honeywell Durafet II Electrodes with Cap Adapter
- Honeywell Meredian I/II Glass pH and Metallic ORP Electrodes
- Other Manufacturer’s Electrodes (Consult factory for applicability)

#### Maximum cable length

- Glass electrode: 6.1 m (20 feet) (Honeywell electrodes)
- Durafet II electrode: 305 m (1000 feet) with junction box
- ORP electrode: 15.25 m (50 feet) (Honeywell electrodes) with junction box

#### Accuracy

- pH: <0.02 Tc: 0.0021 pH/K
- mV: <1 mV Tc: 0.1 mV/K

### Electrode Diagnostics

- **Sensocheck**: Continuous monitoring of glass and reference electrodes (not available with Durafet II)
- **Sensoface**: Provides information on the electrode state via Sensocheck
  - Monitors asymmetry potential, slope, and response time during calibration

### Electrode Calibration

#### Operating Modes

- Automatic calibration with the buffer sets:
  - 00- Knick 2.00 / 4.01 / 7.00 / 9.21
  - 01- Mettler Toledo 2.00 / 4.01 / 7.00 / 9.21
  - 02- Merck/Riedel de Haen 2.00 / 4.00 / 7.00 / 9.00 / 12.00
  - 03- Ciba (94) 2.06 / 4.00 / 7.00 / 10.00
  - 04- Tech. Buffers NIST 1.68 / 4.00 / 7.00 / 10.01 / 12.46
  - 06- Hach buffers 4.00 / 7.00 / 10.18
  - Manual input of individual buffer values

#### Calibration Timer

0 to 9999 hours

#### Calibration ranges

- Asymmetry potential: ± 60 mV
- Slope: 80 to 103 %

#### Nominal Zero

- Valid range: ± 200 mV
- Valid pH-range: 6.5…7.5 pH (without automatic temperature correction)

### Temperature Input

- **Pt100/1000 Ω RTD**: -20.0 to +150.0 °C / -4 to +302 °F
- **8550 Ω Thermistor**: -10.0 to +110.0 °C / +14 to +230 °F

#### Resolution

0.1 °C or 1 °F

#### Accuracy

± 0.5 °C

#### Temperature Compensation

Automatic Nernstian Compensation using Pt100 Ω, Pt1000 Ω, 8550 Ω or manual

#### Display

- LCD display 76 mm x 48 mm dimensions (3” x 1 7/8”), 7-segment
- pH/mV Value: character height 17 mm (.66”), meas. symbol 10 mm (.4”)
- Temperature: character height 10 mm (.4”), meas. symbol 7 mm (.33”)
- Sensoface with three states, 5 status bars, 16 pictographs / symbols, Red Alarm LED

Security protection with four-digit mode codes to access calibration and configuration options

Model Selection Guide

Instructions

APT2000 Transmitter Offers:
- Power Requirements - 2 Wire, 14 to 42 VDC
- Standard - All models CE Compliant
- Standard - NEMA 4X, IP65
- Optional - Three mounting types: (must be ordered separately)
  1. Panel Mount Kit
  2. Pipe/Wall Mount Kit
  3. Protective Hood (requires Pipe/Wall Mount Kit)
- Optional - HART communications
- Approval Options:
  1. General Purpose; also FM Class I, Div 2, Groups A-D
  2. Intrinsically Safe: FM Class I, Div 1, Groups A-D
     CENELEC EEx ib [ia] IIC T6/T4

Select the desired key number. The arrow to the right marks the selection available.
Make one selection from Tables using the column below the proper arrow.
A dot (*) denotes unrestricted availability.

WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. The foregoing is Buyer’s sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.
