

**High Performance
Submersible Liquid Level Transmitters
Type LH-10 - 50 INWC to 400 PSI**

Tronic

(Previous model number 891.13.535)

- 0.125% B.F.S.L. accuracy with 0.05% repeatability
- Rated IP 68 for permanent submersion
- Available with integral Pt 100 temperature sensor for simultaneous level and temperature monitoring
- Vented polyurethane cable withstands 220 pounds of strain
- For depth measurement to 1000 feet

WIKA LH-10 submersible liquid level transmitters and transducers are engineered for a wide variety of industrial and municipal liquid level measurement applications. Each transmitter undergoes extensive quality control testing and calibration to achieve an accuracy $\leq 0.125\%$ full scale. The printed circuit boards use state-of-the-art surface mount technology for protection against mechanical shock and vibration. Each is temperature compensated to assure accuracy and long term stability when exposed to severe ambient temperature variations.

The transmitter features a watertight, vented polyurethane cable that can withstand over 220 pounds of strain. This allows the transmitter to be supported without any additional cabling. The transmitter meets NEMA 6P and IP 68 requirements for submersion up to 1000 feet.

Available options include Teflon cable, lightning protection, 6 volt supply for battery powered operation, and integrated Pt 100 element for temperature measurement.

This compact, rugged submersible pressure transmitter is suitable for applications in level measurement, water and wastewater treatment, well depth measurement, and offshore water depth measurement.

Notes:

* Maximum pressure, causing no permanent changes in specifications but may lead to adjustable zero and span shifts.

** Burst pressure, leading to destruction of transmitter.

Accessories

Vent tube filter

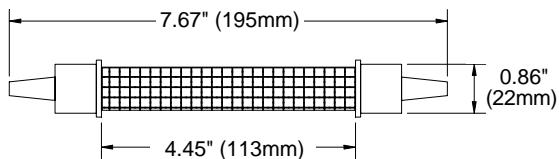

Part# 7193131

The optional Teflon vent tube filter protects the vent opening and protects against the entry of dirt and moisture. It is installed on the vent tube using the supplied heat shrink tubing.

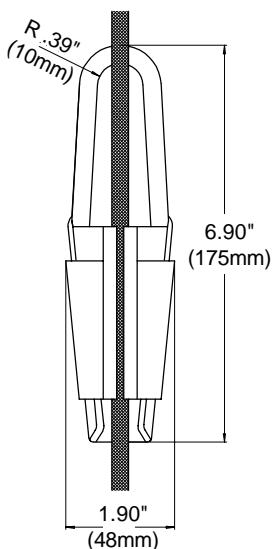

Accessories

(continued)

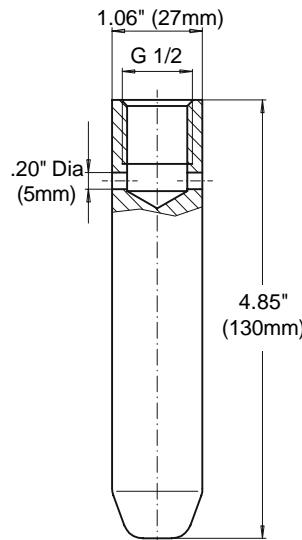

Desiccant drying cartridge part # 9836700

The optional desiccant drying cartridge helps prevent moisture buildup inside the vent tube.

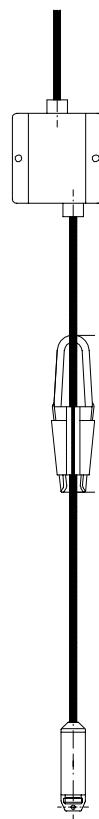

Cable clamp Part# 2074257

The cable clamp secures the cable without bending or kinking that can damage the vent tube or outer jacket.

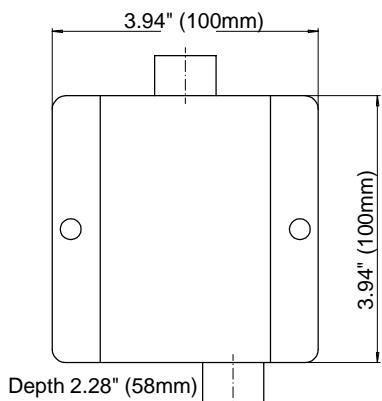

Additional weight Part# 1524399

The additional weight replaces the protective cap and helps to stabilize the transmitter in turbulent conditions. Weight: approximately 1.1 lb, 316ss.

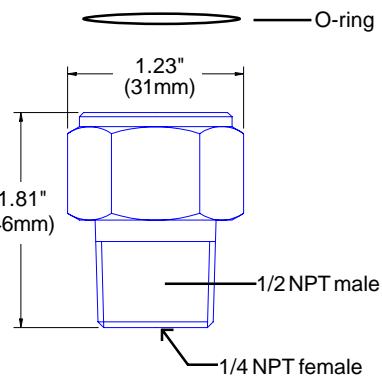

Mounting example

Cable junction box Part# 2074460

The cable junction box is rated NEMA 3S / IP 54 and is suitable for mounting outside tanks or shafts or inside dry control boxes.

NPT adapter Part# 1631322

The 316 ss G1/2 adapter replaces the protective cap and converts the threads to 1/2"NPT male external, 1/4" female internal threads. Includes O-ring.
