XDP Explosion-Proof Display

The XDP explosion-proof display provides the measurement of percent or ppm oxygen or hydrogen gas. The explosion-proof XDP is certified for use in Class I, Division 1, Groups B, & D, and II 2 G Ex d IIC T6 hazardous areas.

The XDP features advanced microprocessor-based electronics, a magnetic through-the-glass keypad, a universal power supply (85 to 264 VAC), one 0/4 to 20 mA or 0 to 2 VDC analog output, four process alarms, and a fault alarm.

Auto-verification/Auto-calibration

The XDP provides long-term, hands-off operation with this optional feature. When initiated, the XDP controls solenoid valves in the sample system to bring zero and span gases to the transmitter. Then the XDP software compares calibration gas readings with factory data to verify proper calibration. If an adjustment is necessary, the XDP makes corrections automatically and notifies the user via the front panel display and alarm contacts.
