

3000R-xxx Series Reduced Port Valve

Quick Spec	
Product Scope	
Size Range	1/2" – 4", Reduced Port
Body Type	3-pc, non Swing-out design
End Connections	Flanged, NPT, Weld, Custom
Pressure Rating	up to 4000 psi WOG (275 bar) & up to ASME Class 900 ²
Temperature Range / WSP	-20°F up to 550°F / up to 450 psi steam -29°C up to 288°C / up to 31 bar steam
Body, Ball, Stem Material	Standard & Special alloys
Ball Seats/ Thrust Washers	PTFE & others ¹
Stem Packing	Adjustable, Live Loaded PTFE or Graphite
Body Seals	PTFE, Graphite & Others ¹
Operator / Mounting Pad	Manual Lever, with Optional Lock / ISO 5211
Design Standards	
Design	ASME B16.34 ²
Flange	ASME B16.5
Thread/Weld Design	ASME B1.20.1 / ASME B16.11
Testing Standards	
Pressure Testing	100%
Approvals	
ISO 9001:2008 Certified Manufacturer	
API 607 4th Edition	
Canadian Registration Numbers (CRN) and coverage available on website ³	
PED Category 1	

Features

- Up to 4000 psi service
- Special barstock body material options including Alloy 20, Duplex, Hastelloy C, Monel, Titanium, 254 SMO, Bronze and others
- Special end connection options, including extended weld ends, RTJ flanges, DIN flanges, SAE Code 61 / 62 flanges, SAE O-ring, Grayloc, Tube End, and others
- ISO 5211 Mounting pad
- Triple sealed blow-out proof stem
- Adjustable, live-loaded stem packing
- Deep pocketed resilient seats
- Double body - end cap seals
- Enclosed end cap bolts threaded into body
- Statically grounded
- Lockout option
- API 607 Firesafe with proper materials (CS or SS body, PTFE, RPTFE or CRPTFE seats with graphite packing and seals)
- 100% pressure tested (API 598 optional)

Materials of Construction		
Part	Stainless Steel	Carbon Steel
Body	A351 CF8M	A216 WCB
End Cap	A351 CF8M	A216 WCB
Ball	AISI 316 SS	
Seat	PTFE & others ¹	
Stem	A479 S31600	
Seal, Body	PTFE, graphite & others ¹	
Secondary Seal, Body	PTFE, graphite & others ¹	
Thrust Washer	PTFE & others ¹	
Packing	PTFE, Graphite	
O-Ring, Stem	Viton, EPDM	
Lock Washer	AISI 304 SS	
Anti-Static Spring	AISI 316 SS	
Gland Bushing	AISI 316 SS	
Anti-Static Pin	AISI 316 SS	
Body Bolt or Stud, Body Nut	A193 B8 Cl. 1 A194 Gr.8	A193 B7, A194 Gr.2H
Belleville Washer	17-7PH SS	
Handle	Carbon Steel	
Cover, Handle	Vinyl	

¹ See page 9

² ASME B16.34 Class Ratings

1/2" - 1-1/2"R — Class 900 (2220 psi CS/2160 psi SS @ 100°F)

2" - 2-1/2"R — Class 600 (1480 psi CS/1440 psi SS @ 100°F)

3" - 4"R — Class 400 (990 psi CS/960 psi SS @ 100°F) Use

³ ASME B16.34 ratings for CRN

Key Features

Cross Sectional Seat View Showing The Seat Pocket

Standard Soft Seats

Standard ball valve "soft" seat material rely upon compression and movement of the seat material to conform to the ball surface for a tight seat. Deep machined pockets protect the seat and minimizes the chance of media and pressure lifting the seat causing damage. Materials include PTFE, RPTFE, C-RPTFE, UHMWPE, KEL-F, and others upon request

Note: A material's tendency to compress or move under load may limit their use at higher pressures and temperatures. Consult the appropriate P/T Chart for proper application information.

Pressure / Temperature Limits

PTFE: PolyTetraFluoroEthylene – Virgin Teflon is a dense Fluorocarbon based polymer that has excellent chemical resistance, good thermal stability, and low coefficient of friction. (White, -50°F to +450°F)

RPTFE: 25% Glass Filled Teflon – Glass reinforced PTFE offers high chemical resistance with improved mechanical strength, stability and wear resistance compared to virgin PTFE. (Off-white, -50°F to +450°F)

CRPTFE: 25% Carbon Filled Teflon – Carbon reinforced PTFE has improved mechanical strength, stability and wear resistance compared to glass reinforced PTFE. (Black, -50°F to +475°F)

Delrin: Acetal Homopolymer – Delrin is a thermoplastic with high mechanical strength and stiffness, good dimensional stability, low friction, and good wear and abrasion resistance. It is used for higher pressure at moderate temperatures over a limited range of chemical applications. (Creamy white, -20°F to +180°F)

Pressure-Temperature Curves PEEK Seats

PEEK: PolyEtherEtherKetone – PEEK is a high performance thermo-plastic with excellent mechanical properties and chemical resistance. It is available FDA/USDA approved. It is used where higher pressures and temperatures are required. (Tan, -70°F to +550°F)

Pressure-Temperature Curves Carbon-Filled PEEK Seats

C-PEEK: 25% Carbon Filled PEEK – Carbon reinforced PEEK provides the maximum compressive strength, stiffness, and wear resistance available. It extends the useable upper temperature compared to unfilled PEEK. (Black, -70°F to +600°F)

Pressure-Temperature Curves UHMW-PE Seats

UHMWPE: Ultra High Molecular Weight Polyethylene - UHMWPE is a semi-crystalline material with excellent chemical, wear and abrasion resistance. It is available FDA / USDA approved. It is primarily used for abrasive applications, and where Teflon cannot be used. (Opaque white, -20°F to +200°F)

Pressure-Temperature Curves KEL-F (PCTFE) Seats

PCTFE (KEL-F): PolyChloro TriFluoroEthylene - KEL-F is a fluoro-carbon based polymer that has cryogenic temperature capabilities and exhibits good chemical resistance and mechanical properties. (Translucent white, -320°F to +400°F)

DN40	24,9	24,9	47,3	73
DN50	27,1	39,9	88	108
DN65	48,8	94	165	237
DN80	152	171	298	396
DN100	165	266	338	602

PTFE, RPTFE, and CRPTFE are the most common seat materials. Operating torque given is for maximum CWP seat rating of valve (see pressure-temperature charts). For required torque for actuator sizing, apply service factor of 1.2 for normal operating conditions. More or less torque may be required depending upon operating differential pressure across closed ball, fluid, frequency of operation, etc.

Consult the Marwin Flow Sizing Program for torques at specific differential pressures and additional seat materials. It may be downloaded for free at www.marwinvalve.com

Z	Non-Standard

16	Positioner
0	None
A	Siemens 760P (3-15 psi), for UT-0/3
B	Siemens 760P (3-15 psi), for UT-3.5/7
C	Siemens 760E (4-20mA), for UT-0/3
D	Siemens 760E (4-20mA), for UT-3.5/7
E	Siemens 2-IQ (4-20mA), for UT-0/3DA
F	Siemens 2-IQ (4-20mA), for UT-3.5/7DA
Q	Siemens 2-IQ (4-20mA), for UT-0/3SR
R	Siemens 2-IQ (4-20mA), for UT-3.5/7DA
Z	Non-Standard

17	Fail Position
0	None / No Spring Actuator
1	Fail Open - 80 psi supply
2	Fail Closed - 80 psi supply
3	Fail Open - 60 psi supply
4	Fail Closed - 60 psi supply

18	Accessory
00	None
04	Air Filter Regulator
