- Heavy-duty valve design actuator closes on centerline
- No packing to maintain, ever
- Accurate, repeatable control
- Ideal for corrosive and abrasive slurries
- True feedback positioning

## Materials of Construction

- Ductile iron body
$>$ ATO/ATC, ATO/FC, ATO/FO, hydraulic or electric actuators
- Sleeves available in Pure Gum Rubber, Neoprene, Hypalon ${ }^{\circledR}$, Chlorobutyl, Buna-N, EPDM and Viton ${ }^{\circledR}$
- Drilled and tapped to mate with ANSI B16.5 Class 150 flanges

Red Valve's Series 5400 Control Pinch Valve features centerline closure, true feedback positioning, a compact size and accurate, repeatable variable venturi flow control.

Centerline closure is extremely important for larger size pinch sleeves on abrasive and high velocity applications. Centerline closure outlasts all other types of gate, plug or ball valves on control of abrasive and corrosive slurries. The resilient elastomer sleeve out-lasts even stellite-coated control valves.

Cone Sleeves can be specified to further enhance control performance and match the exact Cv level desired. True feedback positioning is accomplished through the direct linkage of the pneumatic positioner to the valve stem shaft. The benefits of true feedback positioning on Red Valve Series 5400s include accurate small responsive signal changes to the positioner, causing similar changes in true valve position, greatly enhancing control accuracy and repeatability.

## SERIES 5400

*Consult factory for specific heights and weights of failclose or fail-open valves.
**Higher working pressures available.
***Hydraulic or electric only.
For larger sizes up to 72", consult factory.
